Career Objective

Enthusiastic learner with an interest in Data Analytics, Machine Learning, and Web Development, seeking opportunities to learn, grow, and contribute. Skilled in Python, SQL, and JavaScript, with hands-on project experience and a focus on solving real-world problems.

Education

B.Tech: Computer Science and Engineering <i>Pranveer Singh Institute of Technology (Affiliated to AKTU), Kanpur</i>	Graduation: 2027 <i>Percentage: 83.08 (till 5th semester)</i>
Intermediate (CBSE Board): <i>Happy Model School, Varanasi</i>	Year: 2023 <i>Percentage: 83.4</i>
High School (CBSE Board): <i>Happy Model School, Varanasi</i>	Year: 2021 <i>Percentage: 92.33</i>

Technical Skills

Programming Languages: Python, Java, C++
Core Subjects: Data Structures & Algorithms, Object Oriented Programming System(OOPs), DBMS, Operating Systems
Backend & Frameworks: Node.js, Express.js
Databases: SQL (PostgreSQL, MySQL), NoSQL (MongoDB)
Web Technologies: HTML, CSS, JavaScript
Data Analysis & Visualization: NumPy, Pandas, Seaborn, Matplotlib, MS Excel, Tableau
Generative AI & Automation: Oracle OCI AI Services, Generative AI concepts, AI-powered code generation tools
Version Control & Collaboration: Git, GitHub

Projects

Code Editor: AI-Powered Web IDE Ongoing

Monaco Editor, WebContainers, Node.js, Express.js, WebSockets, Ollama, NextAuth

- Building a **fullstack** browser-based IDE using **Monaco Editor** with real-time code execution via WebContainers and multi-stack templates.
- Implementing **live synchronization via WebSockets**; developing **Node.js/Express.js** backend for session management and user handling.
- Designing responsive multi-language frontend with **syntax highlighting**, **keybindings**, and embedded **xterm.js** terminal.
- Integrating **Ollama AI** for code suggestions and chat assistance; adding **OAuth login** (Google & GitHub) via **NextAuth**.

Tether: AI-Based Missing Person Detection System | [GitHub] June – Nov 2025

Python, OpenCV, MongoDB, HTML, CSS, JavaScript

- Built an **AI-based system** to detect and **identify missing children** and **elderly individuals** using **OpenCV-based computer vision techniques**.
- Implemented **image processing and face matching**, with **MongoDB** for efficient storage and retrieval of image data.
- Developed a **responsive web** interface for managing records and **searching matches**, ensuring usability and accessibility.
- Delivered a **scalable and impactful solution** aimed at improving real-world search and identification efforts.

ChatterBox: Real-Time Chat Application | [GitHub] Jan – May 2025

Node.js, Express.js, MongoDB, Socket.io, HTML, CSS, JavaScript

- Developed a **real-time chat application** enabling **seamless one-to-one communication** using **Socket.io**.
- Implemented **backend services** with **Node.js** and **Express.js**, and used **MongoDB** for efficient message storage and retrieval.
- Designed a **responsive and user-friendly** interface for smooth user interaction and **real-time updates**.
- Ensured **low-latency communication** and reliable message delivery for an enhanced user experience.

Awards & Certifications

- **Claude Code in Action: Anthropic** – February 2026
- **GenAI Powered Data Analytics Job Simulation: Tata / Forage** – December 2025
- **Oracle Cloud Infrastructure 2025 Certified Generative AI Professional** – October 2025
- **Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate** – August 2025

Achievements

- **LeetCode:** Solved **250+** problems (Easy: 80 | Medium: 130 | Hard: 40); focused on arrays, linked lists, trees, stacks, queues, and dynamic programming.
- **HackerRank:** **5-star gold badge** in Problem Solving.
